“There is Safety in Simplicity”

YOUR SEARCH IS OVER

Searching for the next big crypto project can seem like an endless desert, and let's face it, defi crypto is like the wild west. Alas you come across a great new project, only to have it turn out to be an oasis and fails to deliver anything! So many projects come and go, they often start out with a bang and then fail to deliver on their use case or really anything much at all. Then there are the projects that are great in concept but are so complicated they require a set of instructions and degrees in finance and computer science to understand how they work.

Welcome to ShibaSafe, a project created by a team of crypto enthusiast's and developers who share many of your experiences but also share your passion for crypto. ShibaSafe is built around the idea that keeping it simple is the quickest way to get your dog rocket to the moon!

ShibaSafe is guided by a core set principle's:

- **KISS** (keep it simple stupid) – our belief is that simplicity is key to our success.
- **Transparency** – trust is vital, we are committed to open and honest communication with our investors.
- **Integrity** – simply put, delivering on our promises...the first time and every time!
- **Marketing** – It's built into our contract, not just at the beginning but for the lifetime of the project.
- **Fun** – ShibaSafe is going to be a fun project! We plan to keep things lighthearted most of the time. We will mix in the right amount of professionalism to keep things on track and moving forward, and we will always keep things real.

Tokenomics

Buy Taxes

6% Marketing
6% Buy-Back & Use Case

Total: **12%***

Sell Taxes

6% Rewards/Staking pool
4% Marketing
2% Buy-Back & Use Case

Total: **12%***

Marketing distribution

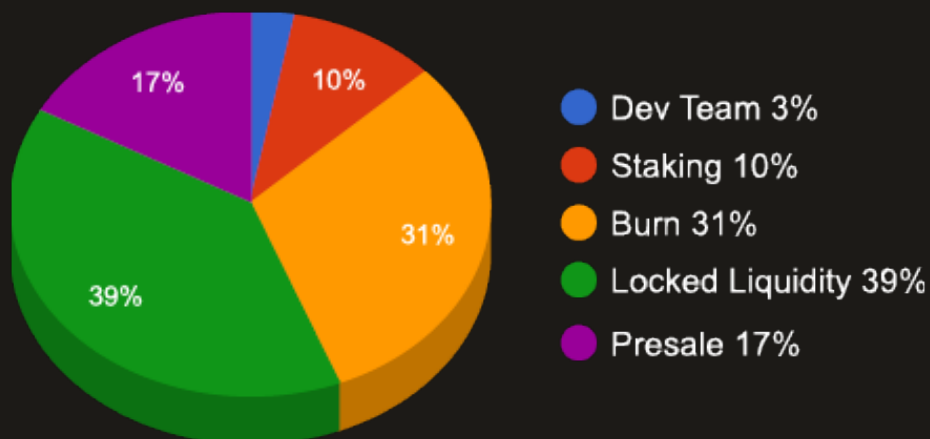

will provide constant fuel for the marketing engine. From social media promoters and influencers to news articles, YouTube videos, community outreach and much more. The options to market and support ShibaSafe are limitless.

Buy-back/use case distribution

will provide a catalyst for upward movement and green candles. This feature allows for the literal buy back and burn of tokens on the market, reducing the supply while fueling the volume and value with the actual buy. It will also provide support to ongoing development and enhancement of our use cases.

*Token allows for variable tax to help discourage heavy sell offs. Token sell tax can increase to as much as 17% based on market conditions, input from the community and project management discretion. Combined buy/sell rate will always total 24%.

Token distribution

Utility

ShibaSafe was created with utility centered around easy to understand functions.

- **Staking** – Ready on day 1, you can stake your ShibaSafe for 7 days or 30 days with variable APR based on the duration that you decide to stake for.
- **Marketing** – The tokenomics are designed to provide constant marketing. Simply put “Wen Marketing” ...all the time!
 - ◇ Social Media Campaigns
 - ◇ Influencers
 - ◇ Videos
 - ◇ News articles
 - ◇ Air Drops
 - ◇ Web advertising
 - ◇ Billboard campaigns etc.
- **ShibaSafe Stable Chart** – The Buy-Back feature built into the tokenomics.
 - ◇ Allows for strategic buy back and burning of tokens in times of stagnation.
 - ◇ Counteracts large wallet sell offs.
 - ◇ Buy-Back feature will create buy pressure and deflationary burning to help boost the charts.
- **ShibaSafe Wallet** – Allows you to keep your tokens safely stored in an easy-to-use wallet with built in features like swapping, staking and a calculator function.

and much more....

Roadmap

Having a vision and plan is vital to the success of any project. We are always listening to input and feedback from the community. We will embrace changes when it is in the best interest of the community and the long-term sustainability of the project.

Q1 - 2022
